

iRiS Menu

Turning your menu digital

iRiS Menu – Turning your menu digital

The iRiS Menu system embraces tablet technology to update and improve the dining experience. With stunningly displayed dishes, diners can almost taste the items the restaurant has to offer, as they browse the menu selections presented enticingly on the iPad. This interactive medium offers several advantages over the current paper menu, including easy revisions for price changes and updating the inventory instantly. iRiS envisages that the Menu will trigger a paradigm shift in the dynamics of dining.

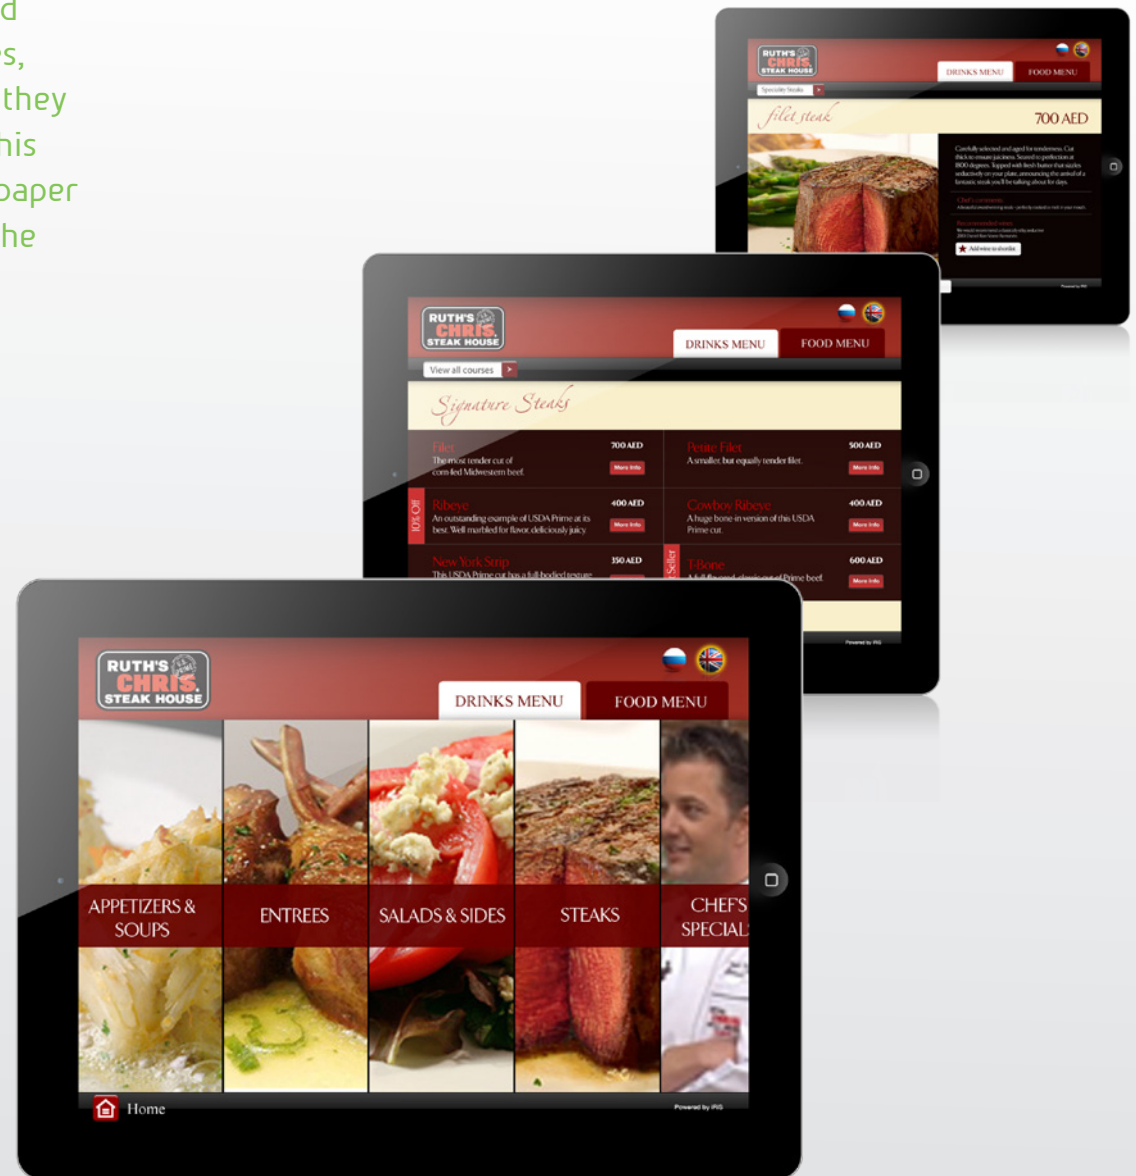

As an early adopter, your restaurant will gain a competitive edge in this exiting industry.
